

FARONICS
INSIGHT™

Comprehensive Lab Control

Computers in schools have the power to enhance the classroom experience for both students and teachers. But the benefits can easily be lost to distracting elements such as games, instant messaging, and web surfing. Designed with the needs of teachers in mind, Faronics Insight is the ultimate classroom management system that empowers teachers with full control over classroom technology and student progress. Faronics Insight enables teachers to harness the educational and productive aspects of computers, while minimizing distracting behavior and temptations. Best suited for K-12 classroom environments, Faronics Insight is changing the way technology is viewed in the classroom.

Insight Benefits

- Empowers teachers with control over classroom technology and student attention
- Fosters cooperative classrooms where learning is achieved through interaction and collaboration
- Strengthens teaching effectiveness with the ability to monitor student progress
- Ensures students are kept on task and engaged in an environment where technology accelerates their learning experience

Faronics Insight makes it easy to monitor student activities and progress.

Key Features

Insight Console

- Easily access the console through the system tray menu
- Manage students in a list view or by thumbnails
- Access features through menus, icons or a right click
- Manage all or just the selected students

Show Teacher to Students

- Show the teacher's screen on the students' monitors
- Full Screen mode makes the teacher's screen take over the entire student screen and lock-out the student's mouse and keyboard
- Windowed mode makes the teacher's screen appear in a re-sizeable window on the student's machine
- Draw on the screen to highlight important details

Show Student to other Students

- Allow a student to demonstrate their screen to the other students in the class
- The student is in control until the teacher stops the broadcast

Blank Student Screens

- Grab the students' attention by blanking their screen and locking out their keyboard and mouse
- While blanking their screen, display a custom message to the class

Remote Control

- Help a student by taking control of their computer's monitor, keyboard and mouse
- Optionally disable the student's keyboard and mouse during a remote control session

Send a Message

- Send a text message to all or selected students

Power features

- From the console you can easily shutdown, logoff or restart student computers
- Power on computers remotely using Wake-on-LAN technology

Thumbnail Monitoring

- View up to 256 hi-color thumbnails at the same time
- Hovering over the thumbnail will cause the size to quickly increase
- The active application and last visited website appear as icons on the thumbnail
- Best fit thumbnail option automatically changes to the optimum thumbnail size

Web Limiting

- Block all Internet activity including all browsers, e-mail and instant messaging
- Allow or block certain websites
- Save and load web limiting websites for different classes

Application Limiting

- Allow only the applications that the students need
- Block certain applications from running
- Save and load application limiting lists for different classes

Student Voting

- Ask the students Yes/No and multiple choice questions
- View the number of students that voted
- Watch the results in real-time

Student Question/Chat

- Students can click on the Insight icon and let the teacher know that they have a question
- The question mark can then be cleared by the teacher
- Teachers can initiate a text-based chat session with a student

Send and Collect Files

- Send files to student computers or their network drive
- Collect files back from the students

Security status monitoring

- All activity within Insight is logged to a status window
- Unauthorized use can quickly be identified so the appropriate measures can be taken

Anti-tampering controls

- Insight does not allow a student to mischievously "unload" the software or disrupt the classroom by unplugging the network cable

Running Applications

- Teachers can view all running applications on a student's computer and add those applications to the allowed or blocked application lists

Screen Snapshot

- Take a snapshot of the student's current computer screen

Internet History

- View a student's Internet browsing history for that day

System Requirements

Faronics Insight works with any combination of computers running Windows 98, Windows 2000, Windows XP or Windows Vista, and is optimized for 800x600, 1024x768 and 1280x1024 screen resolutions. The hardware requirements are the same as the recommended requirements for the host operating system.
